Software Engineering Intern | Full-Stack Web (React · Node.js · PHP) · Flutter · Mobile Development

PROFESSIONAL SUMMARY

Results-driven Software Engineering undergraduate with hands-on experience delivering commercial and academic full-stack web and mobile applications. Proficient in the complete Software Development Life Cycle (SDLC) using Agile and Scrum methodologies, version control with Git and GitHub, and modern frameworks including React, Node.js, Flutter, and PHP. Demonstrated ability to independently architect, develop, and ship end-to-end systems integrating REST APIs, role-based access control (RBAC), relational databases, and responsive user interfaces. Seeking a software engineering internship or junior developer role to contribute practical full-stack development skills in a collaborative team environment.

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, SQL, Dart, HTML5, CSS3

Frameworks & Libraries: React, Node.js, Express.js, Bootstrap, Flutter, Provider

Database Technologies: MySQL, Firebase Firestore — schema design, CRUD operations, relational modelling

Cloud & Backend Services: Firebase Authentication, Firebase Firestore, Firebase Storage, REST API, bcrypt, PDO

Tools & Platforms: Git & GitHub, VS Code, Vite, XAMPP, Figma, Jira, Google Workspace, Microsoft Office

Methodologies: Agile, Scrum, OOP, MVC, RBAC, SDLC, Responsive Web Design, Version Control (Git)

Other: UI/UX Design, State Management, API Integration, Full-Stack Development, Project Management

Soft Skills: Leadership, Teamwork, Time Management, Communication, Problem Solving

EDUCATION

BSc (Hons) in Information Technology

SLTC Research University (ICST Campus), Punanai | 2024 – Present | Expected Graduation: 2027

Relevant coursework: Software Engineering, Database Systems, Mobile Application Development, Object-Oriented Programming (OOP), Web Technologies, Artificial Intelligence & Machine Learning, IT Project Management, Enterprise Application Development

PROJECTS & EXPERIENCE

DineFlow ERP — Restaurant Management Enterprise Web Application *June 2026 – Present*

- Architecting a full-stack Restaurant ERP web application with 6 integrated modules: Order Management, Inventory, Billing & Payments, Staff Management, Menu Management, and Reporting
- Developed backend using PHP 8 MVC architecture with Bootstrap 5 responsive frontend, MySQL relational database, and 4-role RBAC (Admin, Cashier, Kitchen Staff, Inventory Staff)
- Implemented PDO prepared statements for SQL injection prevention and bcrypt password hashing for secure user authentication
- Applied Singleton design pattern for database connections and DAO pattern for data access layer abstraction
- Generating dynamic daily, monthly, inventory, and performance reports to support data-driven management decision-making

Technologies: PHP 8, MySQL, JavaScript, Bootstrap 5, MVC, OOP, XAMPP, PDO, bcrypt

The Outfit — Fashion E-Commerce Mobile Application *March 2026*

GitHub: github.com/AffiDexz/The_Outfit

LinkedIn: [linkedin.com/posts/mohamed-affan-dev_flutter-firebase-mobiledevelopment-ugcPost-7476326824290037760-6rc-](https://www.linkedin.com/posts/mohamed-affan-dev_flutter-firebase-mobiledevelopment-ugcPost-7476326824290037760-6rc-)

- Designed and developed a 17-screen cross-platform mobile application using Flutter/Dart with Firebase Authentication, Firestore real-time database, and Provider state management for full cloud-backed functionality
- Implemented product browsing, category filtering, wishlist, shopping cart, and multi-step checkout supporting real-time Firebase sync; reduced user checkout steps by 40% through iterative UI/UX redesign
- Built and released production Android APK (59.9MB); published source code to GitHub with complete technical documentation and project report

Technologies: Flutter, Dart, Firebase Authentication, Firebase Firestore, Firebase Storage, Provider, Git & GitHub

ICST Hostel Management System — Full-Stack Web Application *May 2026*

GitHub: github.com/AffiDexz/ICST-HMS

LinkedIn: [linkedin.com/posts/mohamed-affan-dev_react-nodejs-mysql-ugcPost-7480475772525105152-14TK](https://www.linkedin.com/posts/mohamed-affan-dev_react-nodejs-mysql-ugcPost-7480475772525105152-14TK)

- Led end-to-end software development and delivery as Project Manager for a 4-member Agile/Scrum team; managed Jira sprint planning, Figma wireframes, and client communication with the university hostel warden
- Architected and built a React + Node.js + MySQL full-stack web application with 3-role RBAC (Administrator, Warden, Student) managing 253 real students across 72 rooms, course-based fee structures, room allocation, and PDF report export
- Deployed complete application to GitHub (101 files); delivered full project documentation, PPTX presentation, and recorded demo video for academic submission

Technologies: React, Node.js, Express.js, MySQL, Bootstrap 5, Vite, Jira, Figma, REST API, OOP, MVC

Online Bookstore — E-Commerce Web Application *June 2025*

GitHub: github.com/AffiDexz/online-bookstore

LinkedIn: [linkedin.com/posts/mohamed-affan-dev_webdevelopment-github-php-activity-7342120879742447617-024P](https://www.linkedin.com/posts/mohamed-affan-dev_webdevelopment-github-php-activity-7342120879742447617-024P)

- Developed a dynamic e-commerce web application with product catalogue, search and filter functionality across 100+ book listings, full shopping cart, and checkout flow using PHP sessions and MySQL database for order persistence
- Implemented fully responsive layout across mobile, tablet, and desktop devices using CSS Grid and Bootstrap framework

Technologies: HTML5, CSS3, JavaScript, PHP, MySQL, Bootstrap, Responsive Web Design
